Login Experience 4

Configuring SecureZip 6

Login Experience

When you first Login to the New Office 2010 Desktop, your profile will be loaded for the first time. This usually takes less than a minute and subsequent logins are even faster. Scroll through the screenshots to get a look at the new interface.

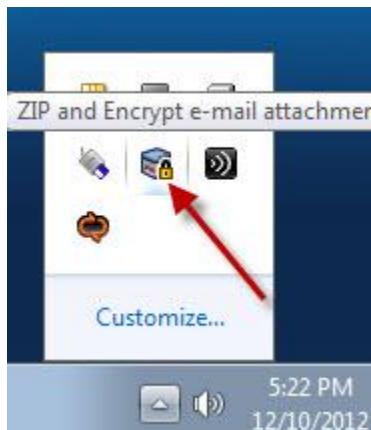

No icons appear on the desktop. Your applications are available through your start menu and task bar.

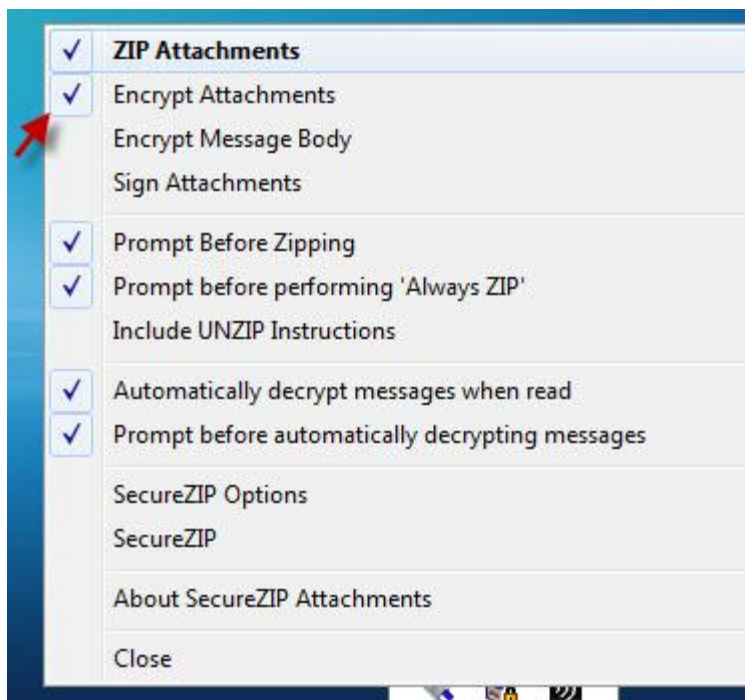

Configuring SecureZip

By default, SecureZip will prompt all emails with attachments to be encrypted with SecureZip. You can turn this off.

In the right hand corner near the clock click on the arrow and some icons will appear. Right click on the SecureZip icon (shown below). A context menu will appear.

In the context menu, uncheck the boxes "Zip Attachments" and "Encrypt Attachments".

Once complete, the options will appear as in the screenshot below. You will no longer be prompted for attachments to be encrypted.
